Projects

CampusConfessions | Python/Flask, SocketIO, Supabase, Firebase FCM

- Built and deployed a full-stack anonymous social platform for college students with real-time chat, polls, voice posts, and emoji reactions live at campusconfessions.in [🔗](#)
- Engineered real-time messaging via Flask-SocketIO with AI-based moderation, and resolved push-notification and database delivery bugs using SQL constraints and atomic upserts
- Deployed on Render with a pooled Supabase PostgreSQL backend, resolving production connectivity issues for stable uptime

Portfolio Website Generator | Python, Templating, AI [🔗](#)

- Built a tool that generates complete, responsive portfolio websites from user-submitted details in seconds using a dynamic templating engine
- Delivered an end-to-end workflow from form input to live, deploy-ready website

GitGrind | JavaScript (ES6+), Chrome Extension APIs, GitHub REST API, Gemini API, Python, C++

- Built a Chrome extension (Manifest V3) that auto-detects accepted LeetCode/GFG/HackerRank solutions and syncs them to GitHub via OAuth and REST API, auto-generating documentation
- Added a gamified dashboard tracking coding streaks and performance analytics, with an AI feature for instant code review and feedback
